

The best components. The best overall package.

## FOR HOMEOWNERS

### Permanently healthy air

- Healthy air humidity, even in winter
- Filtered air free of contamination, pollen or dust
- Removal and dilution of harmful aerosol particles such as viruses
- No noise as a result of airing rooms by opening the windows
- Fresh air round the clock – without having to think about it (e.g. during the night)
- “You’ll definitely miss HomeVent® – when it’s switched off”

### Automatic protection against mould and humidity

- No mould formation on walls and furniture, as HomeVent® controls the air humidity automatically

### Energy-saving

- HomeVent® saves 15 times more energy than it consumes; highest energy recovery of any DCV

### Comprehensive reliability

- The best overall package – air quality, operating convenience, durability and service from a top brand

## FOR PLANNERS

### Coherent complete solution: Heating, domestic hot water and DCV with 1 control system

- Everything from a single source
- Customary top service (24/365) from a proven manufacturer

### Easy to integrate into all building types

- Easy to plan and install – no surprises
- Everything from a single source
- Unit can be installed inside and outside the insulated building envelope
- Low space requirements

### Proven overall package for DCV without weaknesses

- Top DCV, enthalpy, quiet, proven, efficient, easy to plan and install (Isi system)
- Top service from proven manufacturer

### Compliance with statutory requirements – no problem!

- Maximum A+ efficiency through condensate-free heat recovery
- Top components and matching silencers enable the highest acoustic requirements to be met

## FOR INSTALLERS

### Coherent complete solution: Heating, domestic hot water and DCV with 1 control system

- Everything from a single source
- Customary Hoval service also available for controlled residential ventilation

### Complete DCV system: High quality yet easy to plan and install

- Complete system with ALL the components required to ensure reliable planning as well as rapid, seamless installation – complete with insulation (Isi system)
- Comprehensive support for planning and installation

### Satisfied customers: Proven, high-quality DCV and top service

- The best overall package for end customers: air quality, operating convenience, proven technology and peace of mind from an effective service organisation

### Expansion of service portfolio: Installer becomes complete indoor climate supplier

- Low-risk additional service that pays!

## FOR GENERAL CONTRACTORS AND BUILDERS

### Building protection independent of tenant behaviour

- Permanent humidity control
- Helps to retain or increase sale value

### Healthy air and a high level of comfort for residents

- Pleasant, healthy air humidity in winter
- Clean, filtered air
- No outside noise
- Fully automatic and straightforward operation

### Excellent energy performance (energy efficiency)

- High level of heat recovery enables savings on energy-efficiency measures in other areas (building insulation)
- Compliance with the latest energy-efficiency requirements
- HomeVent® saves 15 times more energy than it consumes

### High-quality system from a top supplier offering effective service

- 30 000 successful installations in a wide range of building types
- Large, effective 24/365 service organisation
